

# Official Rules

These are the official rules for the "General Financial Knowledge Challenge". You can find the most up to date version of the rules on the Events tab of [unboundfin.com](https://unboundfin.com).

## Challenge Format

The challenge will be on Kahoot!, where you can compete against your peers. It will consist of 4 "rounds" where each "round" has 8 multiple choice questions. Your score will be calculated based off of the default Kahoot score calculator (on accuracy and speed). The scores from the 4 rounds will be directly aggregated to reach a final score with no extra calculations. The challenge can cover any topic related to finance. (e.g. Macro economy, Federal Reserve policy, equity market and portfolio management, etc.)

## Fair Play Policy

For this competition, no outside assistance is allowed. This includes AI assistant tools (regardless of if they are built in or out of your browser), any information from search engines, help from other sources, etc. Calculators are allowed, but they must not have any AI features.

## Eligibility

Anybody enrolled in a school from 7th to 12th grade may join this competition. A basic understanding of finance and investment topics is expected for this challenge.
